AMERICANS IN LONDON

IF THE recession or the weather are getting you down, American Car Imports just might have the answer. ACI is the UK market leader in shipping and importing all types of American car — from secondhand Cherokee Jeeps to £60,000-plus fins 'n' chrome wrapped Cadillacs with electrically powered everything for the seriously proud to be loud, *writes Aileen Reid.*

Comedian Robbie Coltrane (above), a longtime fan of Fifties Americana and shameless devotee of the in-your-face school of motoring, is soon to be seen on

Carlton from 4 May in Coltrane In A Cadillac, travelling America coast to coast in a '51 Cadillac Series 62 Convertible located by ACI.

The Cadillac was a typical request for ACI's Tony Cohen, who spends four months and 15,000 miles each year searching Florida's dealerships for the cream of classic and modern American cars. He also re-imports rust-free British and European classics such as MGs and Alfa Spyderys that have spent their lives on the salt-free roads of the sunshine states.
